Tortoise Energy Infrastructure Corp. (TYG): Positioned for the future of energy

Tortoise Energy Infrastructure Corp. (TYG) has transitioned its portfolio to position the fund for the future of energy growth. This allocation expansion adds diversification and lower volatility expectations through low correlation across investments. The enhanced strategy also adds visibility into long-term growth opportunities.

We believe the portfolio is well positioned to generate positive risk-adjusted returns for its shareholders by investing in a broader universe of companies that facilitate energy consumption in ways that ultimately reduce emissions. Further, we see energy infrastructure playing a tremendous role in decarbonizing the energy necessary for the economy to function and maintain our standard of living.

Positioned for the future of energy

- **Exposure to energy infrastructure**, long-lived and essential, midstream, power and renewable assets
- **Attractive total return potential** emphasizing current distributions
- **Low correlation** between utilities, renewables and midstream should lead to low volatility
- **Expertise of Tortoise**, a leading and pioneering energy infrastructure investment firm with more than 20 years of experience

Below depicts the shift in TYG's decarbonization infrastructure portfolio allocation[1]

Portfolio allocation

	10/31/2020 Portfolio	6/30/2022 Portfolio
Natural Gas Infrastructure	44%	48%
Renewables and Power Infrastructure Equities	15%	46%
Liquids Infrastructure	37%	5%
Energy Technology	4%	1%
Total	100%	100%

Due to rounding, totals may not equal 100%
[1]Percentages based on total investment portfolio

The additional diversification has led to lower volatility through reduced correlation, particularly with utilites.

5-year correlation

	Pipelines	Utilities
Utilities	0.36	1.00
Equities	0.70	0.49
Crude	0.55	0.20
Natural Gas	0.18	0.04
HY Bonds	0.74	0.48

Disclaimer:

Tortoise Capital Advisors, L.L.C. is the adviser to Tortoise Energy Infrastructure Corp. For additional information, please call 866-362-9331 or email info@tortoiseecofin.com.

All investments involve risk, including possible loss of principal. You should consider the investment objective, risks, charges and expenses of the fund carefully before investing. For this and other important information please refer to the fund's most recent prospectus supplement including its accompanying prospectus and read them carefully before investing.

Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are sold on the open market through a stock exchange. Shares of closed-end funds frequently trade at a market price that is below their net asset value. The fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the fund is more exposed to individual stock volatility than a diversified fund. Investing in specific sectors such as energy infrastructure may involve greater risk and volatility than less concentrated investments. Risks include, but are not limited to, risks associated with companies owning and/or operating pipelines and complementary assets, as well as MLP, MLP affiliates, capital markets, terrorism, natural disasters, climate change, operating, regulatory, environmental, supply and demand, and price volatility risks. The tax benefits received by an investor investing in the fund differ from that of a direct investment in an MLP by an investor. The value of the fund's investment in an MLP will depend largely on the MLP's treatment as a partnership for U.S. federal income tax purposes. If the MLP is deemed to be a corporation then its income would be subject to federal taxation, reducing the amount of cash available for distribution to the fund which could result in a reduction of the fund's value. The fund invests in small and mid-cap companies, which involves additional risks such as limited liquidity and greater volatility than larger companies.
